

Dosage Guide for Dogs

We provide you with the guidelines but *every dog is different*. Most owners know if their dog has always needed a slow introduction of anything new, or just needed less than the standard. Or, they always needed a little more. Use this knowledge with the herbal solutions.

	Weight Dosing	Guideline Measurements
Very Small Breeds	4 - 15 lbs	½ to 1 spoon
Small Breeds	16 - 25 lbs	1 spoon
Medium Breeds	26 - 50 lbs	1½ to 2 spoons
Large Breeds	50 - 80 lbs	3 spoons
Very Large Breeds	80 - 165 lbs	3½ to 4 spoons

2X a day are recommended for our recovery herbal protocols.

1X a day is recommended for supportive maintenance.

Administration: It is best to mix the herbs with a **small** amount of food or gravy so as not to dilute the potency of the herbal solutions.

Herbs should not be given within two hours before or after medication

Acute or severe cases? Exercise your options - start with an accelerated dose.

Example: If your dog is on 3 spoons 2X a day - increase to 3X or 4 spoons 2X a day.

The Administration Chart with dosing guidelines is provided as a reference for calculating dosages. This chart serves only as a guideline - not an absolute rule. Every dog is unique.
